

Stone Placement for Doubles Curling

For The Chestermere Doubles League...

we will use (a) (i) for Position A which is

Guard Stone on the centre line midway between Hog line & Top of House

(9) Before the start of every end, one team shall place their team's "positioned" stone at the playing end of the sheet in one of two positions, designated A and the opponent's "positioned" stone shall then be placed in whichever position (A or B) remains vacant. The location of these positions shall be as follows:

(a) **Position A:** Placement so that the stone is bisected by the centre line and is either immediately in front of or immediately behind one of 3 points in the ice. The points are placed on the centre line:

(i) at the mid-point between the hog line and the outermost edge of the top of the house, or

(ii) 0.915 m. (3 feet) from the mid-point closer to the house, or

(iii) 0.915 m. (3 feet) from the mid-point closer to the hog line.

Based on the ice conditions, the Chief Umpire shall determine the specific placement for Position A to be used before the start of the pre-game practice and that same placement must be used for the entire game.

(b) **Position B:** Placement so that the stone is bisected by the centre line and is in the back of the 4-foot circle. The back edge of the stone is aligned with the back edge of the 4-foot circle.

(10) Power Play: Once per game, each team when they have the decision on the placement of the "positioned" stones, can use the "Power Play" option to position the stones.

(a) The in-house stone, which belongs to the team with last stone in that end, is placed with the back edge of the stone abutting the front edge of the tee line, with half the stone in the 8-foot and half in the 12-foot circle.

(b) The guard stone is positioned to the side of the sheet, so it would be bisected by a direct line between the middle of the in-house stone to the middle of the hack. The distance of this corner guard from the house will be the same distance that was determined for the centre guards.

(c) The "Power Play" option cannot be used in extra ends.

Positioning

The major difference between regular curling and mixed doubles curling is the positioning of two stones – one per team – that are set before the beginning of each end. These “positioned” stones that are placed before the beginning of each end are also eligible to be counted in the scoring.

In a new term, the team with the ‘hammer’ or last stone advantage now has the option. That option is which stones to position where. Teams can decide to put their stone in the back four foot and the other team’s stone as the centre guard. If you choose this option, the opposition would deliver first in the end. If you choose to put your stone as the guard, then you would deliver first.

Here is the positioning (figure no. 1). There are three positions for the centre guard depending on the amount of curl in the ice. The more curl, the closer to house you would position the guard.

This year, the World Curling Federation approved a new option called the **PowerPlay**. This option can be used by each team once in an 8 end game when they have the decision on the placement of the “positioned” stones – but never in an extra end. (Curling rinks can allow unlimited use if they choose.)

The in-house stone, which belongs to the team with last stone in that end, is placed with the back edge of the stone abutting the front edge the tee line, with half the stone in the 8-foot and half in the 12-foot circle.

The guard stone is positioned to the side of the sheet, so it would be bisected by a direct line between the middle of the in-house stone to the middle of the hack.

The distance of this corner guard from the house will be the same distance that was determined for the centre guards.

Each team shall deliver five (5) stones per end. The player delivering the team's first stone of the end must also deliver the team's last stone of that end. The other team member shall deliver the team's second, third and fourth stones for that end. The player delivering the first stone **can** change from end to end.

Modified Free Guard Zone – No stone in play, including the “positioned” stones and those in the house, can be moved to an out-of-play position prior to the delivery of the fourth stone of an end (the fourth delivered stone is the first stone that can remove any stone from play). If there is a violation, the delivered stone shall be removed from play, and any displaced stone(s) shall be replaced to their original position by the non-offending team.
